* Break - series between Aug 69 and Aug 70. Caused by different treatment of hours worked by Teachers. Before 1970, hours worked by Teachers were taken to be award hours; therefore, most Teachers were classified as "part time". From 1970 onwards, hours worked by Teachers were taken "as reported" by respondents, most Teachers were classified as "full-time workers".

EMPLOYED PERSONS : AGRICULTURE AND SERVICES
TO AGRICULTURE ; MINING ; ETC.

The attached tables show estimates of persons employed in : agriculture and services to agriculture ; mining ; and forestry, fishing and hunting, for each August, 1966 to 1970, on the following bases :

1. on 1966 census benchmarks as published in annual bulletins ^(classified according to CLI) including estimates for each August 1968, 1969 and 1970 adjusted, at bulletin manuscript stage(?), for deficiencies in the sample.
2. on 1966 and 1971 census benchmarks, revised for new sample and ~~new~~ revised questionnaire (Feb. 1978) effect and classified according to CLI
3. as 2. above, but classified according to ASIC (i.e. the estimates we intend to publish in brochure 1966 to 1978).

The estimates for 2. above were produced from amended data tapes which included, for August 1969 and August 1970, adjustments for — deficiencies in the sample (see latest folios on file 71/3560). The estimates for 3. above were produced by converting the estimates in 2. to an ASIC industry classification. The following table shows males and females employed in Agriculture and services to agriculture for each August 1968 to 1971 on each of the three bases.

PERSONS EMPLOYED IN AGRICULTURE AND SERVICES TO AGRICULTURE
(000)

	1968	August 1969	1970	1971
		MALES		
1.	361.0	353.4	350.2	333.8
2.	358.8	307.6	343.0	n.a.
3.	352.9	302.7	337.7	319.3
		FEMALES		
1.	55.7	65.2	67.1	66.3
2.	64.9	67.0	77.5	n.a.
3.	63.6	65.4	75.6	70.9

It can be seen that the decrease in males between 1968 and 1969 of 7,600 on the old basis (1.) becomes 50,200 on the new (ASLC) basis (3.) (51,200 on new (CLI) basis (2.)).

This difference cannot be accounted for by the adjustments made to the August 1969 and August 1970 tapes, as shown on 71/3560. The August 1969 tape was amended by transferring 129 ^{NSW + W.A.} records (approx. 12,900 persons) from CLI Farming (code 020) to various other industries (including ^{iron}mining (084)), and by transferring 16 ^{N.T.} records (approx. 1,600 persons) from iron mining to various other industries. Occupation groups corresponding to the industry divisions were similarly affected (e.g. 129 records were transferred from farmers and farmworkers to other occupations), and estimates

of persons employed as farmers, fishermen, timbergetters, etc on the three bases described above are shown in the attached tables.

In view of the differences in trend in the revised estimates compared with the unrevised, it would be advisable to check that the amendments to the August 1969 (and August 1970) tape were made as intended. (See also 77/1385).
